

Student Support Team

The purpose of an Individual Student Support team is to:

- Recruit team members
- Complete functional behavior assessment
- Develop the competing behavior pathway and support plan strategies
- Implement plan and measure interventions for fidelity of implementation
- Monitor overall status of student progress towards goals
- Report student progress to Tier III Coordination team

Student Support Team should be a trans-disciplinary team whose membership includes:

- Δ the classroom teacher
- Δ additional personnel who will be responsible for implementing the intervention
- Δ personnel with knowledge about behavior principles and positive behavior support
- Δ the student
- Δ the parents and/or caretaker
- Δ school-based mental health providers or outside agency

Committed team members assess and develop an individualized behavior support plan, review data, brainstorm ideas, make data-based decisions, and gain consensus.

3.4 Student Support Team

For each **individual student support plan**, a uniquely constructed team exists (with input/approval from student/ family about who is on the team) to design, implement, monitor, and adapt the student-specific support plan.

Main Idea: *Each student receiving Tier III supports benefits from having an individualized team comprised of relevant stakeholders.*
